Testimonial Disclaimer

These examples are not typical. Because of the variables associated with defining success, and because those variables are so personalized, it is impossible to accurately state what an individual may or may not achieve. Success is determined on an individual basis and is dependent on a variety of factors including willingness to take action and implement ideas based on what is taught, prevailing market conditions, target market selection, and the amount of hard work and effort an individual expends. The customers depicted in any testimonials have declared that the information shared is true and accurate of their experience. The written, audio and visual presentations offered may have been edited from their original versions. Some personal and private information has been removed in order to protect privacy.
